ChEMBL
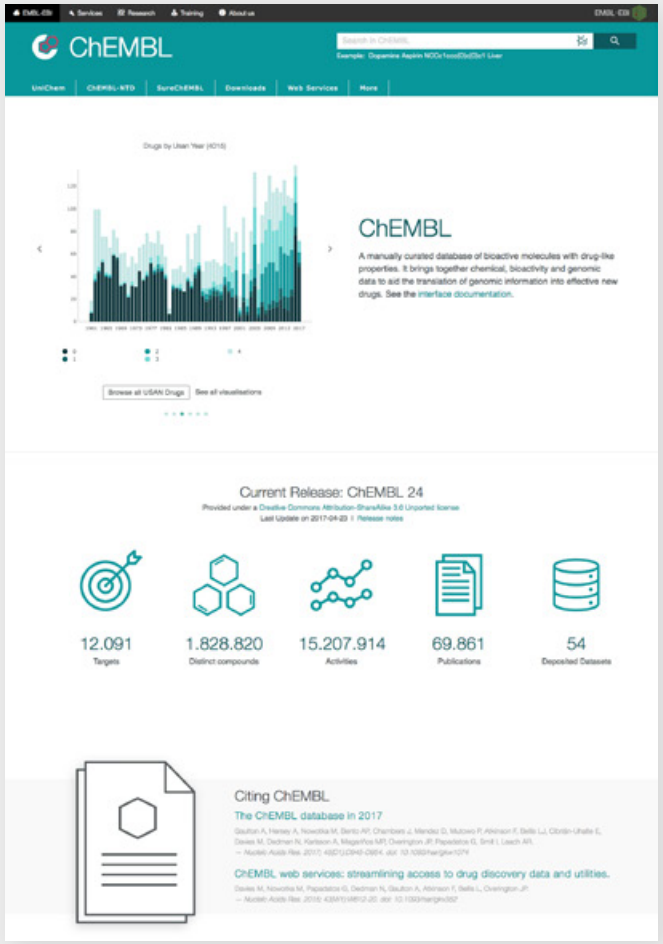
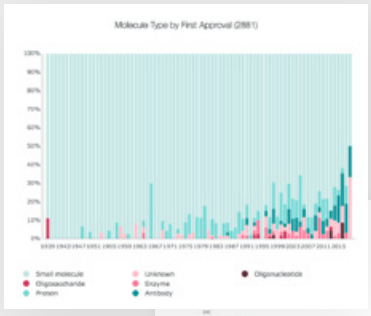
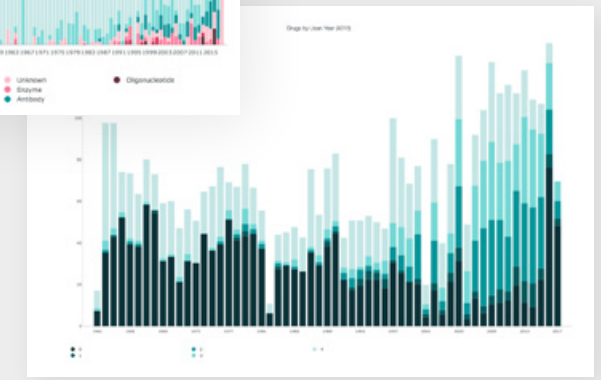
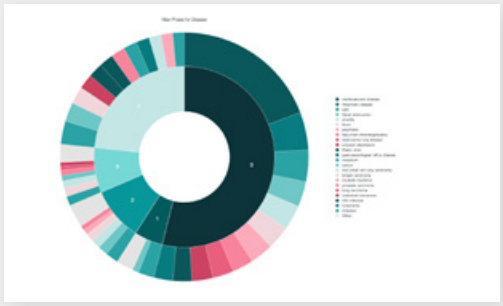
ChEMBL is a manually curated database of bioactive molecules with drug-like properties. It brings together chemical, bioactivity and genomic data to aid the translation of genomic information into effective new drugs.
MacBook Air









CHEMBL DATA VISUALISATION (2018)

Web design and data visualisation for ChEMBL, a database of bioactive molecules with drug-like properties. I redesigned the web interface to make navigation easier and more useful for data scientists. I also developed reusable data visualisations using D3.js and ElasticSearch to help researchers with their computational analysis and to communicate their discoveries clearly and effectively.

Front-end development, interface design, data visualization

COLOMBIAN CONFLICT DATA VISUALISATION (2020)

Data visualisations about Colombian armed conflict for La Comisión de La Verdad de Colombia. I created a series of interactive web visualisations using React.js, D3.js, ElasticSearch, and R (data prep). These visualisations were aimed to help researchers better understand and promote recognition of Colombia's recent history of violence

VOCES DE LA MEMORIA
Museo de MEMORIA de Colombia

BEATRIZ GONZÁLEZ: VOICES OF MEMORY (2020)

This digital exhibition brings together five works by the artist Beatriz González in which she has assumed the relationship between art and armed conflict in an interpretative and reflective way. In this exhibition, the artist's voice guides visitors through various contexts and historical events of violence in Colombia through a digital set-up, where narratives are dynamically animated.

Concept, web development, interface design and illustration.

THE TIME(S) TO LISTEN (2020)

An online exhibition that invites visitors to connect with four textile collectives made up of women who have suffered the war in Colombia, along with their feelings and testimonies regarding the question: what shapes can reconciliation take? For this project, I was responsible for all the web development and interaction design process

DIGITAL ARCHIVE OF TESTIMONIAL TEXTILES (2020)

An open digital space for the documentation, conservation and consultation of testimonial textile practices carried out by groups of women accounting for their struggles during the armed conflict. Conceived as a human rights and historical memory archive, each textile is considered a memory artifact and a narrative to process duels, denounce and demand justice.

Conceptualization, web development, interface design, illustration

THE NOWHERE ARCHIVE (2018 - 2020)

A digital archive where fragments of the collective memory of our generation are displayed. The images that appear randomly, allow the visitor to find a collection of individual memories that try to remain in the immediacy of digital platforms. This is a digital space that receives personal archives and makes the collection of memories received available to the public. An unfinished project, mutating and infinite, in an effort to remain, a place on the Internet that belongs to all.

MUSEUM OF MEMORY OF COLOMBIA (2019)

The museum's web interface has become a space for experimentation and prototyping of human rights and historical memory digital content. Although this museum does not yet have its building, it is alive through the possibilities offered by technology. I have worked towards making this space a place where information about memory practices in Colombia is accessible to the whole of society.
